Subject: RE: meetings

Lisa & Celia – I am going to be transitioning off of the VB/I-70 site as my responsibilities on the Upper Animas site are consuming the majority of my time and with the high priority and expedited schedule for this work in OU2, this seems to be the best time to make this transition.

This email is an introduction to Dania Zinner – another RPM in the Superfund Program who has extensive experience in Superfund. Dania has been working for the last several years on the Libby, Montana asbestos site so she is quite familiar with the issues surrounding the characterization and handling of asbestos which I know is one potential contaminant that could be encountered during the work in OU2. I've copied Dania on this email and her phone # is: 303-312-7122.

I believe the Removal Program in Superfund is assigning an OSC (On-Scene Coordinator) for the time-critical removal action (TCRA) but at this point I don't know who that will be. Dania will coordinate that with Steve Wharton and the Removal Program. I have offered to come to this 1st meeting with Dania to introduce her and assist with the transition.

I will be finishing out the very last details on OU1 but Dania will be taking over both OU2 and OU3 of VB/I-70. I've enjoyed working with you and the City on OU2 and wish the City the best in its development activities in North Denver Cornerstone project. I will assist Dania and the City during this transition as much as I can.

Thank you.

Paula Schmittdiel

Subject: meetings

Good morning, Paula. I need to get these meetings set up. Since you and I and EMSI are the key players here, I am going to go with us as the core group. Everyone else will be invited with some as optional. If they can make it great, if not, perhaps they can ensure their comments are addressed by someone who can. Please let me know what day during the week of June 16 you can carve out at least two hours to go over the draft work plan SOW, MMP, SAP, and HASP. We will get the SOW and MMP to you on May 20 and the work plan, SAP, and HASP on June 1. I anticipate there being considerable back and forth communication before our meetings to finalize the documents. I thought for convenience, we could have our first meeting at EPA. Thanks so much for your understanding and assistance with our critical time line.
